## HCP Early Psychosis 1.1 Data Release: Reference Manual

### Appendix 3 – Change Log

## Change Log from HCP-EP 1.0 to 1.1 Release

---

69 subjects have been added to the HCP-EP Release 1.1 compared to the HCP-EP Release 1.0 on the NDA. A total of 251 subjects have now completed clinical study measures for the HCP-EP Release 1.1 (57 affective and 127 non-affective psychotic patients and 68 matched healthy controls).

Sites	Patients	Control	Total
IU	90	26	<b>116</b>
BIDMC	25	11	<b>36</b>
MGH	10	13	<b>23</b>
McLean	58	18	<b>76</b>
Total	<b>183</b>	<b>68</b>	<b>251</b>

A total of 183 subjects have completed MRI measures for the HCP-EP Release 1.1 on NDA (the same group of subjects as in HCP-EP Release 1.0).

For all subjects from the HCP-EP Release 1.0 on the NDA, a few Clinical Assessments and Procedures NDA instruments collected and listed in the Reference Manual were not indeed released. These instruments have been added to the HCP-EP Release 1.1:

- cogcomp01 Cognition Composite Scores
- psm01 Picture Sequence Memory Test Age 8+ Form A v2.1
- pcps01 Pattern Comparison Processing Speed Test Age 7+ v2.1

In addition to the added subjects for the Clinical Assessments and Procedures, corrections were made to individual subject values for the following NDA structures:

- scid\_v01 (Structure Clinical Interview (SCID-5-RV))
- ndar\_subject01 (Research Subject and Pedigree)
- cains01 (Clinical Assessment Interview for Negative Symptoms (CAINS))
- psychosocial01 (Diagnosis Form)

The specific changes made can be found below.

### ndar\_subject01

src_subject_id	race_1.0	race_1.1	phenotype_description_1.0	phenotype_description_1.1
2007			Affective psychosis	Non-affective psychosis
